PROJECT

Gmail Alert from WhatsApp via n8n

- Built a custom automation workflow using n8n to send Gmail alerts based on incoming WhatsApp messages.
- Integrated Twilio WhatsApp API, Gmail, and conditional filters to trigger alerts based on keywords or sender.
- Demonstrated expertise in API integration, workflow logic, and automation platforms.

Responsive Web Page Design – Figma

- Designed a modern, fully responsive landing page in Figma, with a focus on user experience and accessibility.
- Created wireframes, high-fidelity mockups, and an interactive prototype with transitions and hover states.
- Built a design system with consistent typography, color palette, and reusable components; ensured smooth handoff to developers.
